# 1. Preamble

Two years ago, on November 30 - December 2, 2020, the 8th Digital Earth Summit 2020 was held in the Russian science city of Protvino near Moscow. The scientific forum was held under the motto "Digital Earth in a Changing World: Challenges and Opportunities". The summit was held online due to Covid-19.

The 7th Digital Earth Summit, an international event focusing on digital earth for sustainable development in Africa, was held El Jadida, Morocco, April 17-19, 2018.

The Summit in Protvino was organized with the technical support of the University of Salzburg (Prof. Josef Strobl) providing its online communication software and independent control. 384 participants from 77 countries of the world registered at the online event in Protvino. In 2020, the creation of the Russian branch of the Digital Earth was approved, which became the fifth regional structure of ISDE.

This decision marked recognition of the scientific results achieved by the Neogeography group, its role in popularizing the latest geospatial approaches and innovations, as well as its scientific and organizational activities.

## 2. International Society for Digital Earth (ISDE)

Prof. Huadong Guo

Dr. Alessandro Annoni

The International Society for Digital Earth (ISDE) was founded in Beijing China in 2006. ISDE is an international organization principally promoting academic exchange, science and technology innovation, education, and international collaboration towards Digital Earth.

ISDE's Founding President is Academician Yongxiang Lu, Honorary President is Academician Huadong Guo, and current President is Dr. Alessandro Annoni.

The ISDE Secretariat is hosted by Aerospace Information Research Institute, Chinese Academy of Sciences.

### 3. 7th Digital Earth Summit in held El Jadida, Morocco 2018

Prof. Stanislav Klimenko (1941-2018)

A few days before the opening of the 7th ISDE Summit in Morocco on April 13, 2018, Professor Stanislav Vladimirovich Klimenko passed away after a serious illness.

Prof. Stanislav Klimenko (1941-2018) did a lot for the formation of a new scientific direction in Protvino.

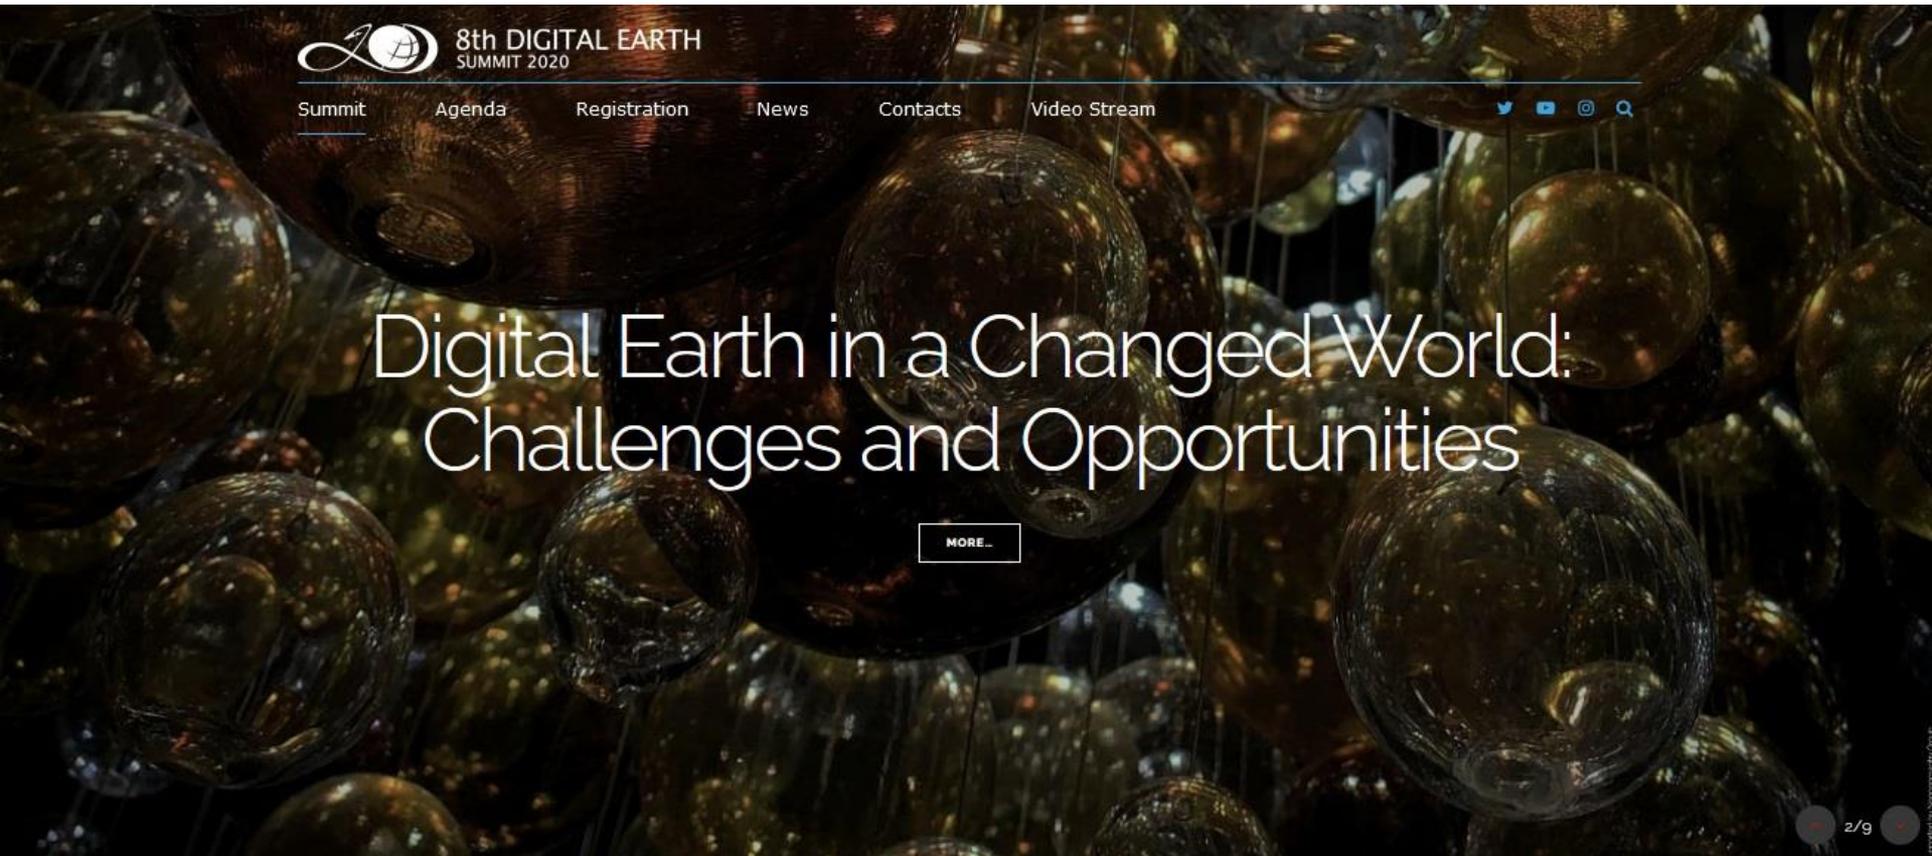

The "Neogeography" group worked closely with Stanislav Vladimirovich Klimenko for many years, and the formation of neogeography also took place with his active participation and was completely unthinkable without him.

## 4. 8th Digital Earth Summit in Protvino 2020

The image is a screenshot of a website for the 8th Digital Earth Summit 2020. At the top left, there is a logo featuring a stylized '8' and a globe, followed by the text '8th DIGITAL EARTH SUMMIT 2020'. Below the logo is a navigation menu with the following items: 'Summit', 'Agenda', 'Registration', 'News', 'Contacts', and 'Video Stream'. On the right side of the navigation menu, there are icons for Twitter, YouTube, Instagram, and a search icon. The main content area has a dark background with a blue and white horizon line. The text 'November, 30 — December, 02, 2020' is displayed in light blue. Below this, '8th Digital Earth Summit' is written in large white font, and 'Online' is written in red. At the bottom, 'SUMMIT FINISHED' is written in large red font. In the bottom right corner, there are navigation controls for a presentation slide, including a back arrow, the number '1/9', and a forward arrow. A small vertical copyright notice is visible on the far right edge.

### Российский Саммит Цифровой Земли: два года спустя

Sergey Tokarev

"I am glad that I was involved in this wonderful event and even a little proud of my involvement in it," Sergey Tokarev, director of the Protvino Technopark, said for the Neogeography portal on the second anniversary of the 8th Digital Earth Summit in Protvino.

The same feelings are certainly shared by everyone who was associated with the organization of the Summit 2020. The Neogeography group continues its activities in Protvino, the relevance of the Summit topics is only growing and we can hope that new results are not far off.
